Product Description

LaneShark LS3 Brush Cutter

The Lane Shark LS3 is a versatile front-mounted brush cutter for compact tractor owners seeking efficiency and precision. Engineered to tackle demanding tasks, this brush cutter for compact tractors offers reliability and ease of use.

The Lane Shark LS3, like the LS4, has the same multi-position cutting capabilities but is manufactured specifically for smaller tractors. The LS3 comes equipped with a 32" cutting diameter and is compatible with tractors with a minimum weight of 2000 lbs and a hydraulic flow range of 5-8.5gpm.

You can maximize your tractor's capabilities with this powerful tractor brush cutter attachment, ensuring top performance in various environments. The Lane Shark LS3 will allow you to transform your brush-clearing experience with unparalleled precision and adaptability.

***Special Note:** All Lanesharks require a special 3rd Function kit to run; price based off tractor.

- The Lane Shark LS-3 is a light-duty rotary cutter designed to clear overgrown roadways, for light land management, and property maintenance.
 - Cutting width / cutting area of 34"
 - Easily cuts up to 2-3" diameter limbs, brush, saplings, and underbrush. The Lane Shark has 11 positions that allow it to cut vertically, offset, directly in front (level), or 25°, 35°, & 45° in the vertical and offset positions.
 - The Lane Shark LS-3 attaches to the front of any FEL tractor with a SSQA or JD Hook & Pin-Style attachment system. There are adapters available to fit most other applications sold separately.
 - The Lane Shark LS-3 weighs just under 320 lbs.
 - When purchasing the Lane Shark LS-3 brush cutter, you will receive a unit equipped with #10 ORB (O-ring Boss) inlets. When using ORB, a minimum hose inside diameter of 3/8" is required.
-
