Product Description

LaneShark LS4 Brush Cutter

Introducing the Lane Shark LS4—a revolutionary vertical brush cutter designed to transform your brush-clearing tasks into quick, effortless jobs. As a leading compact tractor brush cutter, it combines innovation and reliability to meet the demands of any challenging landscape.

The Lane Shark LS 4 is the only patented, multi-position brush cutter for tractors with a minimum weight of 3,000 lbs and a hydraulic flow range of 8.5-20gpm. Supported by a cutting diameter of 44", the LS4 can tackle overgrown vegetation and cut the time spent on brush clearing jobs by more than half, and a wide range of cutting positions makes sure you get the job done right.

Capitalize on the versatility and precision of this front-mounted brush cutter for tractors, ensuring seamless performance even in the toughest environments. Choose the Lane Shark LS4 for a superior brush-cutting experience that optimizes efficiency and delivers exceptional results every time.

*Special Note: All Lanesharks require a special 3rd Function kit to run; price based off tractor.

- The Lane Shark LS4 is a light duty rotary cutter designed to clear overgrown roadways, for light land management, and property maintenance.
 - Cutting width / cutting area of 44"
 - Easily cuts up to 2-3" diameter limbs, brush, saplings, and underbrush. Cutting width is 44". The LS4 has a wide range of cutting positions that allow it to cut vertically, offset, directly in front (level), or 25°, 35°, & 45° in the vertical and offset positions
 - Multi-position adjustment rail for added versatility and an extra foot of vertical extension
 - The Lane Shark LS4 attaches to the front of any FEL tractor with a SSQA or JD Hook & Pin-Style attachment system. There are adapters available to fit most other applications sold separately.
 - Rear rubber skirt and skid shoes for a smoother cutting process
 - The Lane Shark LS4 weighs just under 450 lbs.
 - When purchasing the Lane Shark brush cutter, you will receive a unit equipped with #10 ORB (O-ring Boss) inlets. When using ORB, a minimum inside diameter of 1/2" is required.
-
