Product Description

Landscape Equipment - LLR Dirt Dog's LLR landscape rake is the perfect tool to clean up debris, limbs and rocks with your 40 hp tractor. The LLR's aframe is cat I and Cat I quick hitch compatible and is constructed from square tubing for strength and rigidity. The LLR's 1 1/4" king pin and 3/4" index pin are both fully supported by two, DOM bushings in the backbone. Angling the LLR is easy, just pull the index pin and angle up to 30° in the forward position and up 15° in reverse. The LLR's rake frame is reinforced to prevent flexing so you can tame the biggest debris. The high carbon spring steel rake tines are secured to the frame using two bolts to eliminate rotation. Optional gauge wheels are available to prevent over penetration of the tines, making it even easier to maintain clean, well groomed lots. Dirt Dog's LLR's are available in 48", 60" 72" & 84" widths. Our powder coat paint options allow you to match your tractor with red, green, orange, blue or yellow available.

- category I quick hitch compatible A-frame
 - 6 forward angles and 3 reverse angles
