### **Product Description**

## **Tuff Jug 5 Gallon Jug with Auto Stop Spout - Spill-Free 20-Liter Utility Container**

The Tuff Jug 5 Gallon Jug with Auto Stop Spout is the smart choice for professional fueling operations where cleanliness, efficiency, and safety are the top priorities. The Auto Stop Spout is Tuff Jug's internally vented cap system that automatically shuts off fluid flow when the target tank reaches capacity, eliminating overflow spills before they start. At 20 liters (5 gallons), this container meets the full-capacity needs of commercial equipment operators, farmers, and fleet managers. Available in 12 jug colors.

### **Auto Stop Spout - Intelligent Fueling Technology**

The Auto Stop Spout is a proprietary Tuff Jug innovation. Unlike standard fuel can spouts that rely entirely on the operator to stop the flow, the Auto Stop Spout detects when the tank is full and automatically cuts off the pour. This prevents overfill spills that waste fuel, create fire hazards, and leave messes to clean up. The spout uses internal venting to equalize pressure throughout the pour, maintaining a fast, consistent flow rate without the need for external vents on the jug body.

### **Why Internal Venting Matters**

Traditional fuel containers use external vents that are exposed to the environment and subject to damage, clogging, and accidental liquid discharge. The Auto Stop Spout's internal venting system routes airflow through the spout itself, completely eliminating the need for any external vent hardware. This keeps the container exterior simple and clean, reduces failure points, and ensures the venting system is always in working order as long as the spout is properly installed.

### **12 Color Options for Clear Fuel Identification**

The 5 Gallon Auto Stop Jug is available in 12 jug body colors: Red, Yellow, Clear, Kawi Green, Orange, Cool Blue, White, Forest Green, Desert Tan, Black, Deep Purple, and Hot Pink. This extensive palette makes it straightforward to build a comprehensive color-coded fuel management system. Assign specific colors to

specific fuel types or equipment groups and eliminate the guesswork that leads to misfueling mistakes on the job site or at the track.

## **5-Gallon Capacity for Serious Work**

The 5-gallon format is the benchmark for professional field fueling. This container holds enough fuel to service most commercial zero-turn mowers, generators, pressure washers, and large outdoor power tools through a full work session. For motorsport, the 5-gallon size provides the range reserve needed for endurance events and extended trail rides. One container, one trip, minimal interruption to the workday.

## **Heavy-Duty Polyethylene Container**

The Tuff Jug 5-gallon container is manufactured from high-density polyethylene selected for its resistance to impact, UV exposure, and chemical degradation. The container walls are thick and uniform, the neck is precision-threaded for a reliable cap seal, and the base is stable and flat for secure positioning on any surface. The contoured handle provides a comfortable grip at full capacity, and the overall form factor is optimized for controlled, one-handed pouring.

## **Applications for the 5 Gallon Auto Stop Jug**

1. Commercial lawn care fleet fueling with zero spill tolerance
2. Farm and agricultural equipment servicing
3. Generator and emergency power system maintenance
4. Pressure washer and outdoor power tool refueling
5. Motorsport events where clean, fast fueling is required
6. Any professional fueling application where overflow protection is a priority

## **Professional Build, Professional Results**

Tuff Jug engineered the Auto Stop Spout system in response to the real-world frustrations experienced by professional operators using inadequate fuel containers. The result is a container that fuels faster than the competition, shuts off before overflow, and lasts longer than disposable alternatives. For operators who fuel multiple machines every day, the cumulative savings in wasted fuel, cleanup time, and container replacement costs make the Tuff Jug a sound professional investment.

## **Compatibility**

The Auto Stop Spout is compatible exclusively with Tuff Jug containers. Current-generation spouts are designed for current-generation jug bodies and are not interchangeable with previous model jugs. Verify your jug model before ordering replacement spouts or accessories.
